

“SaveEnergy heat recovery systems supply customers with waste heat from exhaust gases.”

“SaveEnergy exhaust gas purification systems filter over 10,000 tonnes of harmful particulate matter per year from the exhaust gases of combustion plants and industrial systems.”

Would you like to play a part in the energy transition with an international technology leader? You'll have the opportunity to make the most of your professional background and develop your career in one of the most promising sectors of the future: renewable energy. To complement our small, close-knit and dynamic team, we're looking for a person with strong communication skills and the ability to get things done as

Project Manager 80 – 100% (m/f/d)

Your responsibilities

- End-to-end technical and commercial project management of our renewable energy plants, both domestically and internationally
- Independent supervision and management of assigned projects from both an organisational and financial perspective
- Conceptual planning and engineering of the systems
- Design and sizing of components
- Review of quotations for third-party components
- Clarification of delivery times and preparation of schedules
- Additional support and assistance with major projects
- Intensive customer consultation involving travel within Europe (<5%)

Your profile

- A degree in Mechanical Engineering or Process Engineering (or equivalent)
- Experience as a project manager
- Excellent IT skills (Microsoft Office), CAD skills an advantage
- Fluent written and spoken English and French; German would be an advantage
- Independent, committed approach to work, with motivation and passion
- Analytical and holistic thinking, as well as a structured, efficient working style
- Ability to work in a team and a professional, courteous manner
- High resilience, flexibility and an understanding of business management

We offer

You can develop your career with us in an international environment within a promising industry. An exciting role awaits you in a varied field of work, offering a high degree of autonomy and the option to work from home.
